

Subscribe to Blog – Use Google Reader to Let the Information Come to You

1. Look for this gadget in the sidebar of a blog. If you find it, click on it.

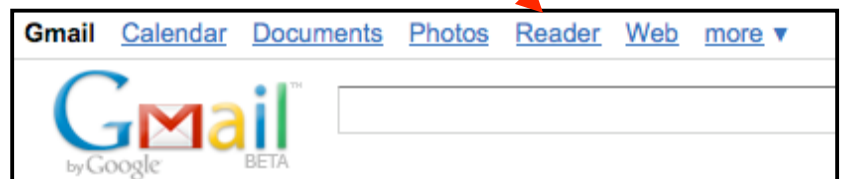

2. This screen will appear. Choose **Add to Google**.

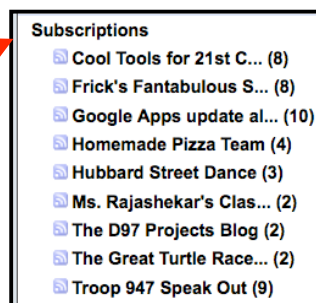

3. Make a choice. If you have an iGoogle page set up, you can choose to have the blog appear on that page, but if not Google Reader is a cool tool.

4. To return to Google Reader to read your subscriptions, choose **Reader** from the Gmail screen.

5. Google Reader conveniently displays your blog subscriptions all on one page.

If there is no **Subscribe To** gadget on a blog, you can copy the web address of the blog and paste it directly into Google Reader.
